

This listing is incomplete! It should not be used to make any statements about production numbers.						
Information gathered by John de Boer for <i>The Italian Car Registry</i>						
News & corrections welcomed: iicar@earthlink.net						
Notes in this listing comes from a variety of sources. Most significantly:						
Owners have shared information about their individual cars.						
An Abarth roster contains information pertaining to cars intended to be sold into the Italian market.						
Each source has supplied inconsistent data and there is a lot we do not know.						
I have to guess that there are several cars missing from this listing and we cannot yet make any definitive statements about production numbers for any version.						
ABARTH 1600 / 2200 / 2400
